

PROFESSIONALS AT WORK

NC storage and transport systems made by LISTA give you the perfect solution for your tool logistics. Our NC modules not only provide professional storage in inserts specially optimised for your machining and cutting tools, but also a safe method of transporting them. Tools are stored in a space-saving and organised way and are always within reach and ready for use. That's not all: our NC modules can be individually equipped and can of course be freely combined with the entire LISTA system in order to make the best possible use of the valuable space in your production facility.

+ Safe, neat and orderly storage
in high-quality inserts made from break-proof, impact-proof and oil-resistant ABS material tailored to hold your cutting tools

+ Optimum use of space
because these high-capacity systems are not only space-saving, but the tools are just where you need them – right next to the machine

+ Customised and easy to assemble
using tool holders with snap fasteners for tool-free insertion and removal

+ Secure transport
thanks to robust and stable design

+ User-friendly and ergonomic
because tool holders can be fitted at an angle and shelves and drawers can be pulled out

>> Benefits of the LISTA drawer cabinets
see p. 38/39

Partitioning schemes for NC tool containers

The capacity of each of the different storage and transport units for NC tools is given in the table below. The partitioning scheme for each type of tool is given next to the corresponding article number. With this scheme you can use the table to calculate the maximum capacity for each storage and transport unit used.

Insert frames in drawers and NC transport units

Units (E)	Dimensions mm (W×D)	A	B	D	E	F	G	H

NC storage in bench stand

Version with pair of frame supports

LISTA frame supports for NC systems have adjustable ranges with three positions so that the height can be variably adjusted to match the items stored. The distance from the insert frame to the top of the tool holder is always 12 mm.

For storage heights
82 – 102 mm
(27 E and 36 E)

For storage heights
127 – 162 mm
(27 E and 36 E)

For storage heights
187 – 222 mm
(27 E and 36 E)

NC storage in drawers

» Drawer cabinets with hinged or sliding doors see p. 74

Version with tool cradles

LISTA tool cradles for NC systems are available in two heights. The distance from the cradle to the top of the tool holder is always 12 mm.

For storage heights 96–135 mm
(27 E and 36 E)

NC storage in cabinets

NC tool holder system

With this system a number of versions are available for different tools and can be fitted in a support in any combination. The holders are screwed together or fixed by means of snap fastener. Specification: high-quality plastic. Colour: red.

Note
 HSK tool holders are available in green on request. The red and green tool holders are required to differentiate between sharp and used tools.

* **Explanation of "screwed"**: screwed tool holders are screwed onto the insert frame or the tool cradle frame with 1 or 2 allen screws.

Insert frame and pairs of frame supports

Available as a set or as individual components. One pair of frame supports is needed for each insert frame. By having frame supports in different heights which can be screwed onto the perforated drawer base together with the insert frame, tools with different cone lengths can be stored in drawers.

Adjustable ranges see p. 101

Partitioning schemes see p. 101

i **Ordering information**
Always take into account the maximum storage height of the tools including any fitting pins.

Insert frame for drawers

To accommodate all types of tool holder. One pair of frame supports is needed for each insert frame. Including screw fasteners. Without pair of frame supports. Specification: steel sheet. Colour: grey, NCS S 4502-B.
